

Overview:

Translational Research and Innovations (TRI) is looking for Interns to join our team this summer!

With our growth, we hope to find students that want to grow and learn with us! This opportunity will help educate those interested in microbiology, chemistry and agriculture on basic techniques, screening and testing methodologies, data analysis & interpretation.

Key Responsibilities & Tasks:

- Paid opportunity
- Length: 16-20 weeks
- Dates: Apr through August
 - Start no later than Apr 15, 2023 and end no later than Aug1, 2023
- Projects will focus on:
 - Microbiological techniques
 - Analytical Chemistry techniques
 - Data analyses and interpretation
- Utilize good laboratory practices and perform lab procedures in accordance with the SOPs Research data and Laboratory record maintenance
- Maintenance of a clean and safe laboratory working environment including organization of materials.

Required Qualifications & Skills:

- Currently pursuing Master's degree in Microbiology, Biotechnology, Chemistry or related discipline
- Undergraduate degree in Microbiology, Biotechnology, Chemistry or related discipline

About Us: Translational Research and Innovations (TRI)

We are developers of biologics-based products and future ready technologies for crop and animal nutrition. Our mission is to serve farmers, growers and industries with our innovative products for enhanced yield and consistent performance.

Location: Translational Research and Innovations, BSC BioNEST Bioincubator, Regional Centre for Biotechnology, Faridabad.
