

# REGIONAL CENTRE FOR BIOTECHNOLOGY

The Technical committee has considered the following –

1. The Committee has decided for not considering the AMD based on following facts:
  - a. AMD server having 2 Socket limitation (max. 2 TB per CPU i.e. max. 4 TB memory) which may not allow to increase the memory size to run the certain bioinformatics applications which requires very high memory. This may also affect the future scalability.
  - b. We are procuring Intel parallel studio (Compiler) which best suits with Intel processes only and AMD may not be compatible with that.
2. GPU
  - a. The Specification has been revised for both the sites. Revised specifications may be read as **Annexure-A**.
3. Other queries-
  - a. Please find enclosed list (**Annexure –B**) along with responses those have been considered / accepted to be changed / revised based on the queries & their justification provided.
  - b. The queries that are not mentioned here are not accepted / considered and same must be remain unchanged. The revised tender document available on Website may be followed to consider and comply accordingly.
